

FoodTrunk

Online food ordering is a process of ordering food from a local restaurant or food cooperative through the internet. A customer will search for a favorite restaurant usually filtered via type of cuisine and choose from available items, and choose delivery or pickup. Online food ordering systems help users to give orders from any place, any time, and pay cash on delivery. The system deals with ordering, processing, and delivering the food product. Ordering is done by a valid customer with appropriate identity.

Four specific functions

The main activity or function of the app are:

1. Easily control the restaurant you see using sort, filter, cuisines, and search. Food deliver quickly and simply.
